PROFESSIONAL SUMMARY

Systems Engineer with 2+ years in enterprise storage and infrastructure operations (P1/P2 incident handling, ServiceNow, SLA-driven support at Sify Technologies) moving into security operations. Built hands-on SIEM and monitoring labs with Microsoft Sentinel, Wazuh and a Cowrie honeypot, with strengths in log analysis, alert triage and Windows/Linux troubleshooting. Holds CEH, Microsoft SC-200 and AWS Solutions Architect – Associate. Seeking an entry-level SOC Analyst (L1) role in the UAE.

CYBERSECURITY SKILLS

SIEM & Security Monitoring: Microsoft Sentinel, Wazuh, log analysis, alert triage, security event monitoring, MITRE ATT&CK mapping

Detection & Investigation: KQL, custom detection/correlation rules, Cowrie SSH honeypot, incident investigation, CEH security concepts

Cloud & Systems: AWS (EC2, S3, IAM, CloudWatch, Lambda), Azure (Log Analytics, Sentinel), Windows Server, Active Directory, Linux, DNS, virtualization

Scripting & Tools: Python, Boto3, PowerShell, shell scripting, Git, ServiceNow

Infrastructure Operations: SAN/NAS storage (NetApp, Dell EMC, HPE, Hitachi), incident/problem management, SLA operations

CYBERSECURITY PROJECTS

Microsoft Sentinel – Cloud SOC Monitoring Lab Oct 2026 | *github.com/Nandagopalan2000/azure-sentinel-cloud-soc-lab*

- Deployed Microsoft Sentinel on a Log Analytics workspace and connected Azure Activity logs using the Content hub solution.
- Wrote KQL queries to validate log ingestion and investigate failed Azure operations by time, caller, operation and resource group.
- Built and enabled a scheduled analytics rule that alerts on 3+ failed operations by the same caller within a 15-minute window; documented rule-design gaps and next steps.
- Published a documented write-up with redacted evidence on GitHub.

Wazuh – SIEM and Endpoint Monitoring Lab Sep 2026 | *github.com/Nandagopalan2000/wazuh-siem-detection-lab*

- Built a multi-node lab: Wazuh all-in-one SIEM on Ubuntu Server with Windows and Debian agents and a Kali Linux attacker node, connected over a Tailscale overlay network.
- Wrote a custom decoder and correlation rule to detect port scans from iptables logs, mapped to MITRE ATT&CK T1046.
- Troubleshot Wazuh indexer startup failures (JVM heap tuning, systemd timeouts) and agent connectivity; documented architecture, setup and findings on GitHub.

Cowrie – SSH Honeypot and Log Monitoring Sep 2026 | *github.com/Nandagopalan2000/cowrie-honeypot-log-monitoring*

- Deployed a Cowrie SSH honeypot on a Debian VM and forwarded logs through Promtail to Loki with Grafana dashboards for centralized monitoring.
- Reviewed attacker connection activity and honeypot logs; produced a project report and GitHub repository.

PROFESSIONAL EXPERIENCE

Career Transition – Cybersecurity Upskilling Sep 2025 – Present

- Focused training and hands-on lab work in security operations: CEH, AWS Solutions Architect – Associate, SRE coursework (Docker, Kubernetes, Prometheus, Grafana, Jaeger, Terraform) and the SIEM, honeypot.

Systems Engineer | Sify Technologies Limited, Chennai Jul 2023 – Sep 2025

- Delivered L1/L2 operations for enterprise storage platforms (NetApp, Dell EMC, Hitachi, HPE, IBM, Cloudian), including SAN/NAS, volume/LUN management, shares and access permissions, snapshots and replication.

- Triaged and resolved P1/P2 incidents and problem tickets in ServiceNow within SLA; coordinated with OEM/vendor support on hardware, disk, HBA, path and zoning issues.
- Monitored health and performance of storage systems and produced capacity/performance reports.
- Supported storage migrations, LUN expansion, ONTAP upgrades and switch zoning using vendor tools and CLI; maintained operational documentation.

CERTIFICATIONS

Certified Ethical Hacker (CEH) – EC-Council | Credential ID: ECC8076329154 | Issued Sep 2026 | Verify: [Link]

Microsoft Certified: Security Operations Analyst Associate (SC-200) | Credential ID: 161142B5332091DA | Issued Oct 2026 | Verify: [Link]

AWS Certified Solutions Architect – Associate | Credential ID: bbdee714cb5a49e9b058fbd65d1a728a | Issued Dec 2025 | Verify: [Link]

Additional training: Site Reliability Engineering (SRE) coursework covering Docker, Kubernetes, Prometheus, Grafana, Jaeger, and Terraform.

EDUCATION

B.E. Computer Science and Engineering | Sri Sairam Institute of Technology, Chennai | 2019–2023 | CGPA: 8.52/10
